
LIAD MANTEKA

QA engineer | Manual & Automation

PROFESSIONAL SUMMARY

Experienced in creating a python automation framework using selenium for a startup called 'trado' for their client-side website, alongside creating basic guidelines on how to use the framework, and creating a wide array of fundamental tests on API requests, database requests and website front-end functionality.

Worked on front-end for a food ordering app using React native.

Skilled in mentoring, working with co-workers in a supportive and communicative workspace.

Looking for QA positions.
