- Finished course as honor student
- Manual & automatic QA
- Python, Bash, SQL and Javascript
- **ISTBQ Certified**

Class of 2019
Major in visual arts
The Herzliya Hebrew Gymnasium High School

Looking for QA | Front-End Positions to further expand my knowledge and expertise. During my time in the army, I figured out I have a passion towards technical details and finding solutions to difficult problems. I then realized that I wanted to be a developer.

After a while, I gained skills in Python as my first programming language and then expanded to different languages.

Skilled in mentoring, and working with co-workers in a supportive and communicative workspace.

I'm currently working towards building my portfolio and realizing my full potential as a programmer.

I recommend you **check out my website** for additional information about me.

Professional Experience

Front-End Developer
Encourse, Internship

2023-Current

Encourse is a web-based mobile app intended for ordering food from independent businesses. The app was built using **react native with typescript**, alongside using expo for a quick development/testing phase. During my time building the app I **incorporated my own reusable components**, replicating the intended design from Figma and **creating logic to handle complex information**, alongside working with a SCRUM team, maintaining good communication.

QA automation engineer
Trado, Internship

2022-2023

Trado is a website for store owners and suppliers, primarily used for large stock orders. During my time there I was in charge of **creating automated test suits** using python to test front and back end functionality, database and API functionality, alongside **creating a Jenkins automation server** to systematically run tests for every new build.

Military Experience

Electronics technician
IDF, Team Head

2020 - 2022

- First-hand technical experience and knowledge of repairing electronics such as night vision googles and sniper/marksman scopes.
- **Team management** and tutoring novice employees while keeping track of proper safety measures and guidelines in a workshop.
- **Support and guide volunteers** with low-functioning disabilities as part of the 'Roeim rachok' foundation for the purpose of integrating people with disabilities into workplace environments.
